```
# This is an example of adding a signal handler that will be # executed when the process exits by throwing a SIGCHLD. import
os import signal import subprocess def cleanup_children(signal_number, frame): for child in
subprocess.list2cmdline(os.waitpid(frame, 0)): try: os.kill(child.pid, signal.SIGCHLD) except: pass try: while True:
cleanup_children(signal.SIGCHLD, os.getpid()) except KeyboardInterrupt: pass
```

Sainte-Germain de Chalmont Sainte-Germain de Chalmont is a commune in the Yvelines department in the Île-de-France region in north-central France. The name is derived from the Benedictine abbey of Saint-Germain-en-Laye (Royal Abbey of Saint Germain), which was founded in 1096. The commune of Sainte-Germain-en-Laye includes the former commune of Chalmont, created in 1967. The name of the commune is commonly spelled Sainte-Germaine de Chalmont or Sainte-Germaine-en-Laye. Sainte-Germaine-en-Laye used to be a

member of the region of Île-de-France until it was detached to become an arrondissement in 1968. See also Communes of the Yvelines department References INSEE Category:Communes of YvelinesQ: Javascript redirection problem I am working on a website which has recently changed its link from a child-domain to the parent-domain. The site is running on a shared hosting plan. I am trying to implement a redirect to However it seems that the site is using redirect on server side. I have checked with the W3Wc Valid 82157476af
